WOOD STOVES

» Rediscover the warmth of wood with our new stoves

Wood stoves offer several advantages that turn them into the ideal choice to heat a home. Besides offering a natural and cozy heat, wood stoves are very efficient, which allows to make the most of the thermal energy contained in wood. Since wood is a renewable source of fuel, stoves are a sustainable and environmentally-friendly option.

We present our new wood range after years of development. Our team proudly launches six completely renovated wood stoves. As a pioneer pellet stove brand, Ecoforest adapts to the market needs and enlarges its product range. We strongly believe in the power of fire, which gives pellet and wood stoves a central role at our homes. They not only provide sustainable heating, but also generate emotions and create unique moments.
